### Application

Desktop & Mobile Application

- Swing GUI Application
- Android Application (Android Studio)

## Involved Project

- FindRoom Rental App
- Timely E-commerce
- TODO Application
- Temperature Convertor
- NepShow Movies and Entertainment
- My Auction-Online Auction System
- Mero Sanjal E-Governance App
- SunshineTech - Company Portfolio
- CoffeeHub - Store Portfolio
- User Portfolio

# Project Details and Roles

- **FindRoom Rental App**

Web-based/PHP

**Project Role:** Backend Developer

**Project Type:** Group Project

It is a web-based application developed by using HTML, CSS, JavaScript and JQuery in the frontend for better user interface and PHP & MySQL in the backend for data handling. User is able to post their empty room or flat in the website and the interested tenant can rent the listing as per the need.

- **Timely E-commerce**

Web-based/PHP

**Project Role:** Full Stack Developer

**Project Type:** Solo Project

It is a web-based application developed by using HTML, CSS, JavaScript and JQuery in the frontend and PHP & MySQL in the backend for data with mailer and payment integration. User can buy the watch as per the needs. There are different types of watch listed in the product section making it different from other website.

- **TODO Application**

mytodoapp.netlify.app

**Project Role:** Frontend Developer

**Project Type:** Solo Project

It is a react based project developed by using React.js and Tailwind CSS for better user interface. It helps us to store our task in the list scheduling it for the certain time to do. It helps to create a list of task to be done or that has been done so far keeping the records of user activity.

- **Temperature Convertor**

cfkconv.netlify.app

**Project Role:** Frontend Developer

**Project Type:** Solo Project

It is a react based project developed by using React.js and Tailwind CSS making it user convenient for use. It is able to convert the given particular value provided by user into the selected temperature category. One can convert Celsius to Fahrenheit and Kelvin, Fahrenheit and Kelvin to Celsius and so on.

## Other Projects

sunshinotech.netlify.app

yourcoffeehub.netlify.app

userportfolio.netlify.app

- **Online Auction**

Web-based/React

**Project Role:** Backend Developer

**Project Level:** Group Project

It is a web-based application developed by using React.js, Express.js, Node.js, MySQL and Tailwind CSS. Mailer and payment integration are used in this project for user convenience. It is such project where user can create a post for other active users to participate in bidding system and the highest bidder until the time end wins the product.

- **NepShow**

nepshow.netlify.app

**Project Role:** Frontend Developer

**Project Level:** Solo Project

It is a web-based project developed by React.js and Tailwind CSS. It is a movies website similar to Netflix and Prime Amazon where all the domestic movies and shows can be watched in fair price reducing the effort to go all the way to cinema hall. It provides newly released movies and shows letting user enjoy different stories and plays.

- **Mero Sanjal**

merosanjal.netlify.app

**Project Role:** Frontend Developer

**Project Level:** Solo Project

It is a web-based application developed using React.js and Tailwind CSS. It is an E-governance App that can be used in the ward committee office to handle those forms and certification request online without having people to stay in queue for all day long.
